

Outbound Fax

Critical Information Summary

Includes Outbound Email-to-Fax & Web Fax Broadcast

Information about the Service

The Service

Outbound fax enables you to send faxes from your computer using either your standard email service (Outbound Email-to-Fax) or the TelcoEdge interactive interface (Web Fax Broadcast).

Please call our sales desk to discuss the best option for you.

We provide you with an interactive interface where you can manage service preferences and view usage reports in real time.

Email-to-fax

Email-to-fax enables you to send a fax document as a PDF file attached to an email.

The destination fax number is simply entered in the subject field of the email, and we provide you with a special email address to send emails to.

Our system will then send the fax to the destination fax number.

The service enables you to send to just a single fax destination number, or broadcast to large numbers of fax destination numbers.

Web Fax Broadcast

Web Fax Broadcast enables you to login to your TelcoEdge interactive interface, upload a PDF document you want to send, enter the preference settings in the interface including the destination fax number and submit the fax job.

Our system will then send the fax to the destination fax number.

The service enables you to send to just a single fax destination number, or broadcast to large numbers of fax destination numbers.

Bundling

This service is not conditional on any bundling arrangements.

Minimum Term

1 month unless otherwise agreed or specified in an offering.
